

Copitrak Path

Powerful user experience, enhanced security and efficient scan performance

Copitrak Path is the most powerful and productive external terminal in terms of user experience and scan performance for the professional market. It is an external hardware terminal with performance comparable to the modern desktop PC which enhances the speed, functionality, and quality of scan delivery all through a single unified user interface. The result leads to improved productivity, efficiency and an enhanced user experience while fulfilling all compliance and network security regulations.

Business challenges

Inconsistent user interfaces: Users who are forced to adapt to inconsistent user interfaces are less efficient and productive. Additionally, this can cause frustration and lead to poor satisfaction and an unhappy workforce.

Inefficient scanning workflows: Without a consistent user interface, it makes it harder for the user to perform their scan workflows efficiently. Also, without the right technology in place users are not able to take full advantage of advanced scanning workflows that lead to increased user satisfaction and ultimately an improvement in productivity and scanning efficiency.

Security and compliance risks: The pains of meeting compliance regulations and enforcing standardized processes are common occurrences that reduce efficiencies and can lead to expensive fines. Organizations that are using older technology open themselves up to security and compliance risks. It is also harder for them to manage and secure their environment.

Key benefits

- Unified user interface
- Powerful, efficient scanning workflows
- Increased security and compliance

Key features

- Support various scanning modes such as local push, network push or pull scanning.
 - Intuitive Smart bar interface – Convenient access to Super-search, job recall, favorites, and other key features.
 - Adaptable to majority MFD makes and models.
 - Easily viewable quick scan feature for quick and convenient scanning
 - Larger industrial grade touch screen measured at 15".
 - Outstanding clarity and light transmission with stable, drift-free operation for accurate touch response.
 - High-end touch technology
 - Faster Intel processor
 - Full keyboard
-

Benefits

Unified user interface: With a consistent, unified interface across all makes and models of MFDs your users will not need to adapt the different user interfaces in a mixed MFD environment. This allows your users to work fast, smarter, and more efficiently.

Powerful, efficient scanning workflows: Utilizing the new Copittrak Edge pull scanning mode, you can now initiate your scans directly from the Copittrak Path terminal's interface. Edge provides enhanced imaging processing capabilities where you can control resolution, DPI, contrast, brightness, auto color correction and duplex, which streamlines your scanning process. This minimizes the need of time consuming, post image processing and allows your users to be more productive and efficient.

Increased security: Copittrak Path comes installed with Windows 10 IoT Enterprise LTSC operating system with extended support. Providing your organization with greater security that is easy to manage and control. This allows your organization to install the latest network security policies and administer them remotely.

***Windows 11 Pro option available.*

Copittrak Path is a powerful terminal that will enhance your scanning workflows, make your organization more secure, and ultimately improve the productivity of your workforce. The Copittrak Path terminal is intended to replace your current Copittrak eClipse terminals to vastly enhance security, implement advanced scanning features, and increase overall functionality.

SAI's Copittrak Path terminal with floor stand shown in picture above. Clients requested a larger screen for easier manipulation of documents, we listened.

Feature comparison

Key Features	Copittrak eClipse	Copittrak Path
Larger screen	8" LCD touch panel 800x600	15" TFT LCD touch panel 1024x768
Faster performance	More than 10 years old ARM processor	The power of a modern Intel based CPU
Operating system	Windows CE 4.2	Windows 10 IoT Enterprise LTSC (Win11 Pro also available upon request)
Scanning functionality	Folder watch (network only)	Folder Watch (Supports local or network) With option for TWAIN scanning on a wide variety of MFD's)*
Card reader options	External only	External optional
Includes (in box)	Monitor	Monitor, PC, auto-color detection for most MFD's, and table stand
Accessories (buy separately)	Keyboard floor stand with keyboard tray desk mount	Floor stand with custom keyboard tray, keyboard
